Est walkers 10

Towpath, Brail Farm

Our 2nd guided walk from the wharf along the towpath headed SE to find GBED8 – the diagonal path across to Brail Farm. Crossing the road, we stayed on GBED8 to the path junction at Wilton Brail. We turned left here back to the towpath on GBED11. The group noted that GBED11 was ploughed close to the field edge, it should have the width of a bridleway. GBED10 where it goes across the field to cross GBED12 to the towpath is not visible in the field and it is blocked at the towpath by a barbed wire fence (this has since be corrected when the bridge was rebuilt in 2017) It was also noted that GBED 12 shows little sign of use (since cleared and waymarked by the group in 2016 & 17)

No map available – contact for details.
